REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Ramaswamy et al. (USPN 6,510,164) disclose a multiprocessor computer system comprising a plurality of network interfaces, each coupled to respective external networks for receiving and sending data packets to and from remote devices.

Peters et al. (USPN 6,097,727) disclose a route selection system for providing an end-to-end communications path between an origin node and a destination node.

Richter et al. and Jackson et al. (US 2003/0046396, US 2002/0194251, US 2002/0152305, and US 2002/0120741) disclose a distributive interconnect for interconnecting two or more content delivery engines of a content delivery system, where the use of the distributive interconnect allows latency between content delivery engines to be short, finite, and follow a known path.

However, none of the submitted prior art references in the IDS, submitted by the Applicant on September 24, 2010, discloses the claimed features of:

regarding claim 1, one of said switch controllers further comprises:

a programmable switch support means for providing an interface to said programmable switch,

a call control means for establishing a connection between ports on said programmable switch, and

a management interface means for providing an interface to external management systems;

regarding claim 23, sending a second programmable switch application programmer interface message to command a programmable switch to send an address complete message to said public switched telephone network,

sending a third programmable switch application programmer interface message to said programmable switch requesting sending of an answer message to said public switched telephone network, and

sending a fourth programmable switch application programmer interface message to said programmable switch requesting connection of a circuit;

regarding claim 28, commanding said programmable switch to park channels associated with an originating party and the intelligent service network component,

sending the intelligent service network component a call offered message indicating a reorigination request was received from the public switched telephone network, and

commanding said programmable switch to connect the originating party and the intelligent service network component.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
